Peach Appeal Plus!

That's just what our trees have — Appeal Plus — They're clean, bright barked, well branched, and heavy rooted. When your customer sees them he's going to want some for his very own. You can recommend them with confidence. After a couple of years your customer who buys one of these trees will have a shade tree — a beautiful blooming ornamental tree, and a regular food factory all in one. Then too they're ideal for the kids to climb in. What other tree gives you so much for your money?

Many of you who read this have never sold peach trees to your customers. Now is an ideal time to start. The spring season is before you. Your customers need to produce at least a part of their food supply. You as a merchandiser need to open up another avenue of profit and we as a producer need YOU as a new customer. Let's get together for our mutual benefit and share in the profits to be realized from selling these outstanding peach trees during the coming spring months. ORDER NOW! We'll ship whenever you want.

LATE RED:

Below are a few facts about some of the Newer Peach Varieties

Developed by USDA — Released in 1945. One of the earliest — 6 weeks ahead of Elberta. Clingstone, good sized and round. Bright red blush over ¾ of its surface. Flesh is yellow, firm but melting, extra good flavor. Has taken the place of Mayflower, Uneeda, and Early Rose.

Developed by USDA — Released in 1944. Ripens 4½ weeks ahead of Elberta. Freestone when fully ripe. Good size, attractive red blush over ½ of surface with bright yellow ground color over rest of peach. Firm melting flesh-fine textured and good flavored. It is recommended as an early shipping variety and local market peach because of color, quality and shipping characteristics. Tests show it to be one of the best varieties known for canning and freezing. The flesh is non-browning when thawed after being frozen.

Developed by USDA — Released in 1946. Yellow freestone. Ripens with HileY 2½ weeks ahead of Elberta. Large fruit half covered with red blush. Flesh is firm, slow softening and good flavored. Ships and handles well. Excellent for canning and freezing.

↓SULLIVANS EY. ELBERTA:

Discovered by Mr. Sullivan in a Georgia orchard. Ripens 1 week ahead of regular Elberta and possesses all the other good characteristics of the "Old Stand-By" Elberta.

Not too new perhaps, but we call your attention to it because of many fine qualities. Yellow freestone ripening 2 weeks ahead of Elberta. Large size deep red coloring and fine flavor. Tree is a strong grower — very hardy — One of the leading varieties.

Developed at the South Haven, Michigan Experimental Station. Yellow freestone of fine quality. Brilliant red color with creamy yellow background. Smooth skin almost fuzzless. Ripens 4 weeks ahead of Elberta. Colors well before it ripens. Heavy bearer — excellent canning and freezing peach.

Ripens ½-1 week after Elberta. Large round yellow freestone. High colored, excellent quality Holey-type fruit. Brings a good price on the market because of its attractiveness and quality. Excellent for canning and freezing.

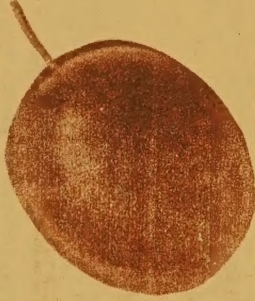

APPLE 2 year Grafted Trees—Well Branched—Insect & Disease Free

There aren't many apple trees this season, however we have a few of all the leading varieties. SO --- send your order in while our stocks are complete and get what you want when you want it. The quality is the best --- while they last.

ADVANCE PLANNING PAYS!

The spring season is now getting under way and we send you this list so that you may order those items you will be needing to boost your sales higher than ever before. Overhead costs are still high. You need to have every item possible that will return a profit. The trees we offer you are top-quality in every respect. They will return you an extra nice margin of profit. **PLACE YOUR ORDER NOW** and be sure of getting what you want. We will ship whenever you say.

Our list of varieties is broad — Giving you a wide range of choice — Our sizes vary from the large jumbo "quick-bearing" size to the smaller sizes which can be resold at a bargain thereby getting more people into your place of business.

REMEMBER ♦ **The 5 P's Pay Premiums:**

PLAN YOUR NEEDS (Today)
PLACE YOUR ORDER (With Southern)
PUSH YOUR SALES (Everyday)
PUT AWAY YOUR PROFITS (For Safety)
PLEASE THE BOSS (Your Wife)

Advertise the advantages of home produced tree ripened fruit. Tell your customers about the "Triple-Roll" fruit trees play: Furnishing shade, glooms, AND fruit for the home. For instance a dollar or two invested in an apple tree today will bring stately shade to the home grounds — a myriad of beautiful blooms in the spring — and baskets of luscious fruit to be consumed by the entire family. **WHAT COULD BE A GREATER VALUE?** The self satisfaction of producing a part of the homes food supply is alone worth many times the cost of the tree.

All you need to do is to show the home owner the many advantages in owning his own fruit trees and the sale is made.

Send that order in today so we can reserve your trees for you. By ordering your trees early you can allow plenty of time for shipment by railroad or truck freight and thus save on the transportation charges.
